

PRESS RELEASE

TO BE PUBLISHED IMMEDIATELY

**Simware Solutions forms a new wholly owned subsidiary in the United States :
SIMWARE SOLUTIONS LLC.**

Madrid, Spain and Delaware, USA — March 30, 2016

Simware is expanding its presence in the USA. We have now a wholly owned subsidiary, Simware Solutions LLC, registered in the state of Delaware, to attend our business in this important market for our platform.

Simware Solutions LLC will allow strengthening our presence in the main market for simulation & training solutions. This is part of our strategy to position Simware as the open platform of reference for simulation solutions in USA. This new company will cooperate with our research and commercial partners in order to improve the user experience in LVC simulation. LVC simulation is one of the main challenges to be solved in the US market in coming years. Military and commercial users of simulation solutions are demanding a better integration of their simulation products in LVC networks, leveraging open interfaces and platforms. Simware will help to do a riskless evolution of the existing stovepipe systems to smart connected devices, seamless integrated in the network with other devices.

About Simware Solutions

Simware Solutions is leading the introduction of Open platforms into the Simulation & Training markets. Our platform Simware leverages the new Layered Simulation Architecture or LSA to fulfil the requirements of the lead users of the industry, which are demanding open architectures, better interoperability and increasing economical returns for their investments in simulation and training solutions.

Our platform is the first commercial product available to build and federate simulations in compliance with initiatives at SISO and NATO related to the use of Simulations assets as Services in the Network. Simware platform provides, out-of-the-box, everything you need to build your Internet of Simulations. Multi-standard compliance makes affordable to any budget the development and deployment of any kind of simulations over any type of network. Simware Solutions is the technological company of NADS. NADS is a simulation company, leveraging radical innovations to make affordable the use of simulation solutions for anyone, anywhere and anytime.
