TO BE PUBLISHED IMMEDIATELY

Simware Solutions signs partnership agreement with Nanjing RuichenXinChuan Network Technology CO., Ltd (RCXC).

Madrid, Spain and Nanjing, China— April 25, 2016

RCXC will develop a whole new generation of virtual simulation systems using Simware platform as the backbone.

Simware Solutions, a global leader in standards-based, Open Simulation platforms, announced today that it had signed a strategic cooperation partnership with RCXC. Under scope of this agreement, Simware Solutions will be the technological provider of RCXC for its new generation of simulation & training systems. RCXC is a simulation & training company, incorporated and existing under the laws of China and has its main office in Nanjing.

To Simware, this agreement is strategic because it will allow having in the market very exciting new products in the near future in full compliance with its Simware platform. Simware Solutions will help RCXC to leverage the best features in the platform to create new RCXC's Virtual Simulation Training platform. Quoting Mr Jose-Maria Lopez, General Manager in Simware Solutions: "We are very proud to have a partner as RCXC in our ecosystem. They are developing a modular and fully distributed training solution based on Simware that is going to be a very disruptive product to create innovative and highly integrated simulation applications combining the best features of 3D gaming, virtual reality, real time simulation, and distributed computing".

To RCXC, this agreement is a great opportunity to get access to the leading open platform for distributed simulation, Simware. Sui Wentao, the General Manager of RCXC said: "We are very honoured to cooperate with Simware Solutions, her platform Simware adds to our simulation system more diversification and specialization, and lays the foundation for further in-deep work. "

About Simware Solutions

Simware Solutions is leading the introduction of Open platforms into the Simulation & Training markets. Our platform Simware leverages the new Layered Simulation Architecture or LSA to fulfil the requirements of the lead users of the industry, which are demanding open architectures, better interoperability and increasing economical returns for their investments in simulation and training solutions.

Our platform is the first commercial product available to build and federate simulations in compliance with initiatives at SISO and NATO related to the use of Simulations assets as

Services in the Network. Simware platform provides, out-of-the-box, everything you need to build your Internet of Simulations. Multi-standard compliance makes affordable to any budget the development and deployment of any kind of simulations over any type of network. Simware Solutions is the technological company of NADS. NADS is a simulation company, leveraging radical innovations to make affordable the use of simulation solutions for anyone, anywhere and anytime

About Nanjing RuichenXinChuan Network Technology CO., Ltd

RCXC is an integrator and reseller involved in provide latest virtual reality technologies and services for customer in China, and we have also developed intellectual property rights owned by ourselves.

Our company focus on VR, Engine, distribution learning, serious games and training-simulation, and the business is diversified, ranging from the sale of simulator products to providing comprehensive services such as training and aviation services, integrated enterprise solutions, in-services and crew sourcing. We apply simulation expertise and operational experience to help customers enhance safety, improve efficiency, maintain readiness and solve challenging problems. We are now leveraging our markets such as mobile games, motion capture and driving simulator.
